

# Review of Measure Formulas

Feb 15-8:05 AM

Central Angles

$$\angle ACB = \widehat{AB}$$

Feb 15-8:21 AM

Inscribed Angles  
(formed by the intersection of two chords on a circle)

$$\angle ADB = \frac{1}{2} \widehat{AB}$$

*same*

Feb 15-8:21 AM

Angles formed by the intersection of two chords inside a circle

$$\angle AFB = \frac{1}{2} (\widehat{AD} + \widehat{BE})$$

Feb 15-8:21 AM

Angles formed by the intersection of a chord and a tangent on the circle

$$\angle DAB = \frac{1}{2} \widehat{AB}$$

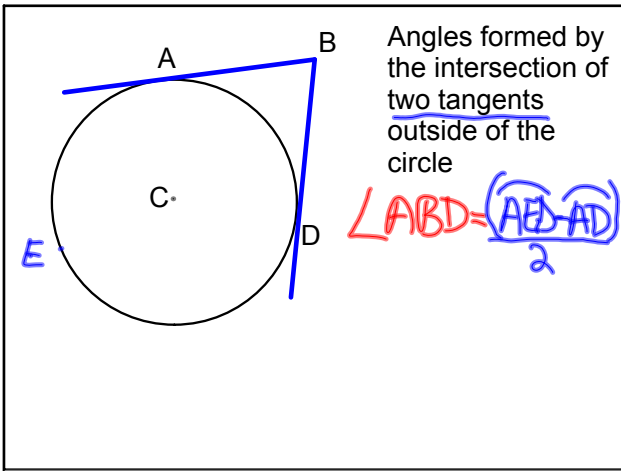

Feb 15-8:21 AM

Angles formed by the intersection of two secants outside of the circle

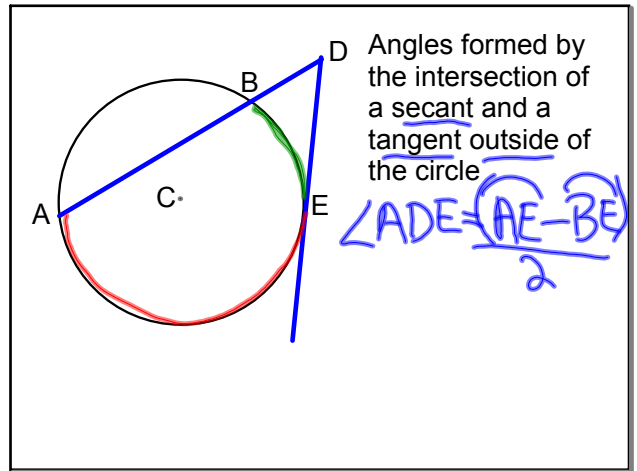

$$\angle FDA = \frac{1}{2} (\widehat{AF} - \widehat{DE})$$

Feb 15-8:21 AM
